>>> "Naranjo, Eugenia" <Naranjo.Eugenia@epa.gov> 1/15/2014 2:23 PM >>>

Thanks Rob, we got your message.

- 1) We would be able to provide the updated FFS model code and inputs/outputs -including remediation files- (STM and CFT) in early February.
- 2) You can find the revised NBSA CSM submitted by Tierra in July 2013 at the hightail.com link below (please note that we will be sending final comments to Tierra on the CSM next week):

<http://www.hightail.com/download/elNLQmtSbEFPSHIVQUIUQw>
- 3) We do not have the complete source investigation data, and what we have is preliminary and not validated. I will give you an update of when we can expect to have the complete validated dataset as soon as we get that information from the lab.
- 4) We are working on contracting Jonathan Clough to review the CPG's bioaccumulation model. Jonathan and HydroQual will be available to meet with the CPG modelers in Mahwah either Thursday February 13 or Thursday February 20. Please let us know your team's availability.

Subject: CPG Requests

Eugenia:

I wanted to confirm the requests for additional information that I made on behalf of the CPG last Thursday evening at the CAG Meeting. These include:

1. EPA's updated FFS model including code, documentation, input files, and output files that have been used to generate EPA's latest recovery predictions; this request is detailed in de maximis' December 20, 2013 letter and AQEA January 6, 2014 email to HQI.

2. Updated NBSA CSM recently submitted to EPA that you and I discussed.

3. Validated Source Investigation data collected by EPA in late 2013 when available

In addition, the CPG is following up on its December 20 request that the meetings discussed in USEPA Region 2's October 23, 2013 letter, during the EPA-CPG November 14 modeling meeting and the CPG's November 22, 2013 letter be scheduled for January and February 2014 as agreed. As I have discussed with Stephanie, Ray and you - the CPG suggests and I believe there is agreement on the EPA's part that the first modeling meeting should be on the CPG's bioaccumulation model.

Please confirm receipt of this message and let me know when I can expect each of these items.

Thank you.
